ALL HEALTH REGULATIONS

ALL ANIMALS

- The animal health regulations of the Veterinary Division of the North Carolina Department of Agriculture and Consumer Services (NCDA&CS) will be strictly enforced, and decisions of the regulatory veterinarian concerning animal health status are final.
- All animals not meeting the entry requirements, that have an unthrifty nature or are in an unsuitable condition, and/or are exhibiting any signs of disease or illness (including obvious abscesses that are opened or closed, ringworm, sore mouth or any other signs of contagious disease) may be refused entry and will not be allowed in the barn/display, may be isolated and/or required to be returned to the farm of origin as determined by the regulatory veterinarian. Any questionable health problems will be referred to the regulatory veterinarian, show committee, and/or the State Veterinarian.
- During the duration of the Fair, all animals of unthrifty nature, unsuitable condition and/or exhibiting any signs of disease or illness or found not to have met entry requirements after entry may be required to be isolated and/or returned to the farm/premise of origin as determined by the regulatory veterinarian.
- The Fair staff works diligently to prevent diseased animals from entering the fairground, though owners should consider that animals may be exposed to infectious agents while at the Fair. It is a best management practice to keep exhibit animals returning from the Fair separate from your animals at home for 2-3 weeks. By isolating exhibited animals for this time, any animals exposed to disease while at the Fair should show signs of infection during this period. Once this period has passed, they can then be commingled with the animals that remained home.
- All livestock must have a form of identification (ear tag, tattoo, ear notch, or microchip readers must be supplied by owner) to enter the Fairgrounds. All sheep and goats must comply with USDA and NCDA&CS Scrapie Eradication Program guidelines. Sheep and goats without a scrapie tag or a registration paper with corresponding tattoo or microchip information at the time of check-in will not be allowed. Scrapie Flock ID numbers must be presented at the time of check-in before an approval card can be issued. The Scrapie Flock ID number is not the same as the National or State Premises ID number. To obtain a Scrapie Flock ID number, please see the Goat and Sheep entry requirements section.
- Drug and Chemical Compounds Policy for all NCDA&CS Sponsored Fairs, Exhibitions, and Events. The use of any drug and/or chemical compound in any manner that is not approved by the FDA, including but not limited to indications and directions on species, age, dosage amounts and/or withdrawal times, is illegal and prohibited.

ALL HEALTH REGULATIONS

ALL ANIMALS (CONTINUED)

- The owner, exhibitor, fitter, trainer, and/or other responsible person must notify show management before the animal is admitted to the livestock or poultry barns if the animal is being administered any drugs or chemical compounds. All treatments must be in accordance with approved FDA guidelines and used solely to protect the health of the animal. Acceptance of the animal for exhibition will be at the discretion of the animal superintendent and the show veterinarian. Approval will depend on factors such as the type of drug or chemical compound being used and proper justification from an accredited veterinarian who has a valid veterinarian–client–patient relationship. Under no circumstances will livestock or poultry be allowed to exhibit if the use of any drug or chemical compound affects the animal’s performance or appearance at the event.
- Owners, exhibitors, fitters, trainers and/or responsible persons will be held accountable for the presence of any violative drug residue from their animal and subject to the disposition as specified below:
 - Findings of proof of intentional use of any drug or chemical compound in a manner described as illegal and prohibited by the Policy on use of Drugs and Chemical Compounds will result in immediate disqualification and forfeiture of all premiums and prizes.
 - If proof of intentional use of any drug or chemical compound in an illegal and prohibited manner cannot be found on an animal that has been demonstrated by the above detailed laboratory methods to have the presence of such a substance, a first-time offense for a positive test will result in immediate disqualification, and forfeiture of all premiums and prizes. A second-time offense by that exhibitor for any drug or chemical compound in a manner described as illegal and prohibited will result in immediate disqualification and forfeiture of all premiums and prizes.
- Drug testing at the Fair may include, and is not limited to, the following drugs: Acepromazine, Albuterol, Altrenogest, Azaperone, Balbuterol, Boldenone, Bumetanide, Chlorpromazine and all other tranquilizers, Clenbuterol, Dexamethasone, Flumethasone, Flunixin, Furosemide, Isoetharine, Isoflupredone, Flumethasone, Methylprednisolone, Nandrolone, Paylean (labeled for swine only), Phenylbutazone, Optiflex (labeled for feedlot cattle only), and Terbutaline.
